## SURFING@WORK

### We track the Internet to sift treasure from trash

With digital cameras pushing photo albums out of the picture, most of us are content with storing digital photographs in electronic folders. But, if you want to prevent a hard disc crash from erasing all your photo memories, log on to **WWW.ZOOMIN.COM**. This newly launched website will allow you to store, share and print your digital photographs. Upload your pictures (unlimited photo storage capacity) and share them with friends and relatives across the globe. Here's our favourite part: Order picture prints, and ZoomIn will deliver them to your doorstep within the next working day. Price ranges from Rs 4 to Rs 40 per print (plus a flat shipping charge of Rs 25 for the entire consignment).

### Get smart with your Photos, India
